2 DAY ADVANCED
SOLAR PV HANDS ON
WORKSHOP

Sponsored and hosted by
Broadway Electric Supply Co

2 Day Advanced Solar PV Hands On Course

Students will take part in extensive hands on training and be exposed to a variety of solar equipment - for both residential and small commercial Photovoltaic (PV) projects. PV design and installation is the main focus of the 2 Day Advanced Solar PV Hands on Course and students will develop and work on skills that would ensure proper designing methods and installation practices to successfully grow their PV installation business.

The Advanced Solar PV Hands on Workshop covers common steps as well as different scenarios of residential and commercial PV system installations to prepare students for a variety of real life situations they might come across on the job site.

85% hands on experience on different racking and different inverters, commercial and residential roofs, building integrated PV.

15% classroom activities – design, installation, industry practices, troubleshooting and maintenance

2 Days of the ultimate “on the roof” experience!

Thu 4/7 and Fri 4/8

8:30AM - 5:00PM
